DECLARATION BY THE CANDIDATE

I/We, ARIGELA PRANAY KUMAR (20R11A6701), B.DIVIN (20R11A6705), CHARAN SAI PARITALA (20R11A6708) hereby declare that the project report entitled “**GCTC PORTAL MODEL**” is done under the guidance of **Ms. VYBHAVI**, Department of Computer Science and Engineering, Geethanjali College of Engineering and Technology, is submitted in partial fulfillment of the requirements for the award of the degree of **Bachelor of Technology in Computer Science and Engineering**.

This is a record of bonafide work carried out by me/us in GEETHANJALI COLLAGE OF ENGINEERING AND TECHNOLOGY_and the results embodied in this project have not been reproduced or copied from any source. The results embodied in this project report have not been submitted to any other University or Institute for the award of any other degree or diploma.

Name of the Student(s), Roll No(s),

Department of CSE,

Geethanjali College of Engineering and Technology,

ACKNOWLEDGEMENT

ABSTRACT

The abstract of the project is to design a Gctc portal Model while changing a few things about the portal look and organization, the project is completely made using native HTML, CSS and JavaScript

Some things which are an Improvement over the original portal are

- Digital library
- Improved Animations
- Rearranged Notifications
- Placement Details Improvement
- A registration from where students can register to receive updates from the collage

1. Introduction

1.1 About the project

The project is made in attempts to understand all the steps required to make a full working real life project and how things work internally, some of the improvements are made to the project and some parts of the projects are reverse engineered to make the project feel the same to a normal user

1.2 Objective

1. The project is divided into 6 Parts
 1. Home
 2. Register
 3. Notifications
 4. Placement Details
 5. Digital library
 6. Contact Us
2. At first Opening the project the User will be taken into the home screen where different widgets are loaded in the body section
3. From that the user can select which option they may like E.g. : Join social Media page, Results, Placement Details and Register links

4. At the footer section all the social media Handles of the official Geethanjali college are provided and a few Examples of all the projects done by College are Displayed
5. Users can navigate to the Register page and fill in the required details ,This details will further be used to send information about the college directly to the registered number
6. Notifications and Placement details are further re-designed to provide more information
7. Digital library ,The Books in the Digital library are arranged accordingly to provide maximum ease of use
8. All the books are separated by the year and section alike

2. System Analysis

2.1 Existing System

The existing system has some issues with the Animation and some lack of features like a Digital library and a student registration form where the students can enter or update their data to which their information needs to be sent

2.2 Proposed System

2.2.1 Details

The original idea of the project was to make a model design of the Gctc website which can be used as alternative to the official Gctc portal, improving in the areas of Animations and user accessibility

2.2.2 Impact on Environment

The project has no effect on the environment

2.2.3 Safety

The user security is not compromised and no data of the user will be able to viewed by and user other than the administrator

2.2.4 Cost

The cost of the project is quite negligible as it is a open source project and all the services or updates provided by the portal are by student volunteers

2.2.6 Type

Web application

2.3 Scope of the Project

2.4 Modules Description

The two essential features which are the center of the design were Digital library service and Registration page

Digital library

It can be very helpful to many students and it has very little maintenance, some students need to volunteer every year and need to check the contents of the files available and need to update it if any newer version of the files are available to download

Registration

Registration is the module where the required information is entered by the user and to that number or email all the required information about the user will be sent such as, Results information and attendance information

2.5 System Configuration

No additional configuration to the system are needed

3. Literature Overview

The tools required to run the project are

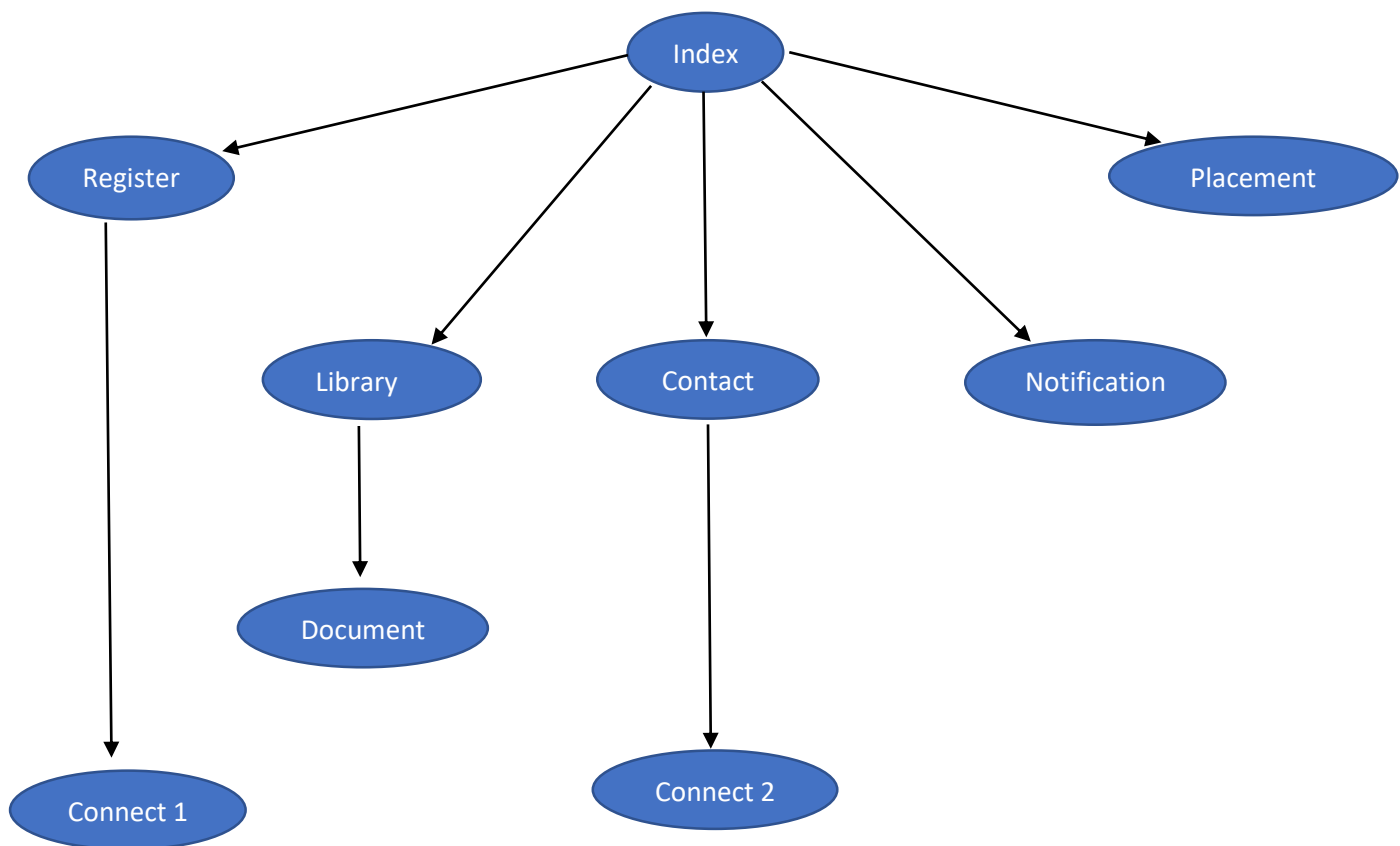

OS: Windows

Additional software: XAMPP, Browser

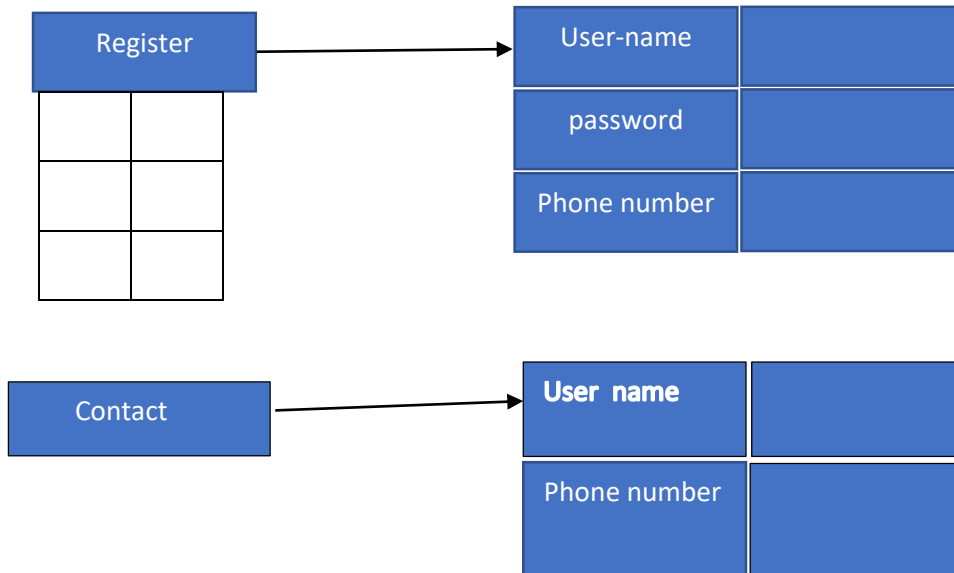

4. System Design

4.1 System Architecture

The system is divided into 5 working modules and 2 of them are connected to a database, The index file acts as the main entry point to the user and then users can navigate through it

4.2 UML Diagrams

5. Sample Code

5.1 Coding

7. Conclusion

In the above project we have completed all the necessary improvements to the current portal as we initially required and in this process we learned a lot about web development and deployment
